

End of September Quarter

As we approach the end of September, the first quarter of the 2008-2009 financial year comes to a close.

Now is probably a good time to revisit any new financial year resolutions/goals and to measure the progress towards these goals. Also it is now an opportunity to get a feel for how the year may pan out. What has to be done to capitalise on a good start or what has to happen to turn the year around if there has been a slow or subdued start?

Too often we wait until the year is nearly done before we check out where we are at. If you have to do a September quarter BAS, pay quarterly bills or take a deep breath with the kids on school holidays, now is the time for some navel gazing and implement the things which will make a difference to either your business or the household budget. With 9 months left in the year it gives time to implement strategies that can make this year a good one!

If you need any assistance to set or achieve your goals - we can help. Call or email the office at your convenience.
